Mountain Weather Forecast

Bannau Brycheiniog (Brecon Beacons) National Park

Forecast valid from 06:00 on Friday 14 Jun 2024 until 23:59 on Saturday 15 Jun 2024

Forecast Issued on Friday 14 Jun 2024 at 03:32

Confidence: High for sunshine and showers through the period, with a trend towards drier weather into the coming week. However low in terms of the shower details and for the position of any organised or slow-moving bands of rain or showers. High confidence for temperatures to remain on the rather cool side for the time of year, but trending upwards a little next week.

Headline for Friday 14 Jun 2024: Spells of heavy rain and blustery showers with a chance of thunder.

Mountain weather hazards on Friday 14 Jun 2024

Precipitation probability					
40%	40%	60%	60%	30%	20%

Forecast for Friday 14 Jun 2024

Weather: Early cloud soon lifting. Then a day of sunny spells and heavy showers, and the outside chance of a rumble of thunder. These most likely later in the afternoon, but possible from late morning. Showers easing during the evening, to leave variable cloud and clear spells. Feeling rather cool for June, but still some warm sunshine.

Chance of cloud-free hill tops above 600m: 40% becoming 80% by late morning

Low cloud and visibility: Areas of cloud as low as 500m during the morning, but becoming more occasional at around 800m by late morning. The odd patch perhaps retuning to 600m during any heavier burst. Visibility excellent outside of rain, but and moderate to poor in heavy rain or showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A cold day, especially on exposed summits and in the wind. Showers are also likely, and these could turn thundery, so worth checking what to do if caught in a thunderstorm. Despite cooler temperatures, UV levels will be high in any sunshine. So warm waterproof layers, and appropriate sun protection will both be needed.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Fri 14 Jun 2024	4.6mm	4.6mm	5mm

Forecast for Saturday 15 Jun 2024

Weather: A similar day to Friday, with sunny spells but also heavy showers and isolated thunderstorms possible throughout. Periods of lower cloud also possible, perhaps most likely early morning and late afternoon, which could bring a more widespread band of showers for a time. Feeling rather cold in the brisk breeze, with gales possible on the tops.

Maximum wind: Westerly 30 mph gusting 40-50 mph.

Chance of cloud-free hill tops 600m: 40%

Low cloud and visibility: Areas of cloud possibly obscuring routes above 600m at times. These most likely early morning and then again late afternoon. Heavy showers could also bring brief periods of cloud down to 600m. Outside of cloud, visibility will be very good to excellent, but falling to poor or moderate in any heavy rain

Temperature: **Valleys:** Plus 6 Celsius rising to Plus 17 Celsius.
At 600m: Plus 5 Celsius rising to Plus 10 Celsius.
Freezing level: Above the summits.
